March 23, 2020

From: STAT Analysis Corporation

To: Our Valued Customers

STAT Analysis Corporation is an essential business and will remain operational during the COVID-19 crisis. We will be open Monday – Friday 9 AM to 5 PM. We will notify you of any changes via email and on our website (statanalysis.com).

During this time, non-employees will not be permitted entry into the facility.

Please utilize the sample drop box (located to the right of the building entry call box) for Industrial Hygiene samples including lead, asbestos and microbial samples. Please complete Chains of Custody prior to dropping off samples. We will collect samples from the drop box throughout the day.

Chains of Custody are available from our website:

Asbestos: <http://www.statanalysis.com/pdfs/STATAnalysis-IH-Asbestos-COC.pdf>

Lead: <http://www.statanalysis.com/pdfs/STATAnalysis-IH-Lead-COC.pdf>

Microbiology: <http://www.statanalysis.com/pdfs/STATAnalysis-IH-micro-COC.pdf>

For coolers or large order drop offs, please call and we will pick up curbside. Do not use the drop box for 'environmental samples' in glass containers. We will have limited courier service available during this time. Please schedule sample pick up a day in advance. Pick up charges may apply.

It is important to practice social distancing to reduce the possibility of transmission both to our customers and employees. We appreciate everyone's understanding, cooperation and patience while we make these needed adjustments. Please stay safe and thank you for your continued business. STAT Analysis can and will assist our customers to whatever extent possible. If you have any questions, or need additional information please do not hesitate to contact us directly.

Sincerely,

STAT Analysis Corporation
